

The Holy Qur'an

Guidance for Mankind

PROPHECIES

Relativity

“Allah it is Who created the heavens and the earth, and that which is between them, in six periods; then He settled on the Throne. You have no helper or intercessor beside Him. Will you not then reflect?” (Ch.32 v.5)

“He will plan the *Divine* Ordinance from the heaven unto the earth, then shall it go up to Him in a day the duration of which is a thousand years according to what you reckon.” (Ch.32 v.6)

“The angels and the Spirit ascend to Him in a day the measure of which is fifty thousand years.” (Ch.70 v.5)

The Holy Qur'an not only talks about the creation of the universe in six periods or days, but it also sheds light on a fact that was only discovered thousands of years later. Time was always considered to be a constant equally applicable across the universe and forever. The Holy Qur'an says that the interpretation of time or a “day” can be different in different points of references. In these verses the Holy Qur'an states that a “day” as mentioned by Allah can be equal to a thousand or fifty thousand “days” as the humans know it.

Air Traffic

“And by the heaven *full* of tracks,” (Ch.51 v.8)

Thousands of aircraft are in the air at any given time. Collision avoidance systems and ground and air controls are used to make sure the aircraft do not collide and arrive at the destination by following their designated paths in the sky; making our sky literally a “heaven full of tracks”.

Biometrics

“...their ears and their eyes and their skins will bear witness against them as to what they had been doing.” (Ch.41 v.21)

The Holy Qur'an hints at the advent of finger prints and retinal scans for investigative purposes.

Pollution

“Corruption has appeared on land and sea because of what men's hands have wrought, that He may make them taste *the fruit* of some of their doings, so that they may turn back *from evil*.” (Ch.30 v.42)

One of the interpretations of this verse is the spread of environmental pollution over land and sea which is caused by the actions of man himself. The verse also talks about the negative impact of pollution and to the fact that man will eventually have to turn back from this state of affairs.
